Portfolio

Professional Summary

Python-focused software engineer with hands-on experience across data engineering, machine learning, and full-stack development. Currently completed an exchange in Applied Data Science & AI at BUas (Netherlands), alongside a B.Eng. in ICT at JAMK (Finland). Seeking entry-level, graduate, internship, or freelance roles in Python development, data engineering, data science, or software engineering.

Education

Breda University of Applied Sciences (BUas)

Exchange – Applied Data Science & Artificial Intelligence

Sep. 2025 – Jun. 2026

Breda, Netherlands

JAMK University of Applied Sciences

B.Eng. in Information and Communication Technology

Aug. 2023 – Present

Jyväskylä, Finland

Experience

Data Scientist

Jan. 2026 – Jun. 2026

PlaySmart · Breda Guardians Esports, BUas

Breda, Netherlands

- Continued development of a YOLOv11 computer vision pipeline for automated reaction time analysis — optimised inference performance through GPU migration (CUDA) and batch processing improvements.
- Integrated Nuanc BLE wearable rings for real-time EDA biometric capture, resolving a MAC address rotation bug in Windows BLE by passing scanned device objects directly to BleakClient.
- Built and maintained backend data pipelines in FastAPI; implemented server-side pandas analytics with in-process caching, replacing 100+ batched frontend HTTP calls with single-query computation.
- Engineered full SFTP server integration for session video streaming, match listing, and analytics retrieval using Paramiko and range-request chunking.

Data Engineer

Sep. 2025 – Jan. 2026

B.G.E.T. · Breda Guardians Esports, BUas

Breda, Netherlands

- Designed ETL pipelines ingesting Riot Games & Henrik's Valorant API data, correlated with Tobii Eye Tracker biometric streams via a timestamp-based matching engine.
- Architected PostgreSQL schema and FastAPI backend; deployed custom YOLO models on a dedicated AI server for reaction time and map-awareness analysis.
- Packaged React/TypeScript frontend as Electron desktop app; managed Linux server deployment via SSH/SFTP and Paramiko.

AI Code Trainer & Evaluator

Nov. 2024 – Dec. 2024

Outlier · Remote Internship

Finland

- Evaluated AI-generated Python code for correctness and efficiency; provided structured feedback to improve LLM training data quality.
- Wrote optimised Python solutions with comprehensive test suites; documented alternative approaches to diversify generative AI training examples.

Projects

Task Manager | *Python, Django, SQLite, JavaScript, Bootstrap*

2024

- Multi-user task management app with secure auth, user-to-user task assignment, deadline tracking, and search; responsive UI via Bootstrap.

Flask Todo App | *Python, Flask, SQLAlchemy, Jinja2*

2024

- Web-based task manager with full CRUD, search/filter by title or description, and creation timestamp tracking.

Library Management System | *Python, SQLite, CLI*

2023

- Cross-platform Python CLI app managing library inventory with SQLite; zero external dependencies.

Technical Skills

Languages: Python (advanced), SQL, JavaScript/TypeScript, HTML/CSS, Bash/Shell

Data & ML: Pandas, NumPy, scikit-learn, TensorFlow, Keras, OpenCV, YOLOv11, Seaborn, Plotly, Streamlit

Backend / APIs: FastAPI, Flask, Django, REST APIs, JWT Auth, PostgreSQL, SQLite

Frontend / Desktop: React, TypeScript, Electron, Vite, Bootstrap

DevOps & Tools: Git, Linux/Bash, SSH/SFTP, Paramiko, Poetry, Docker (basic), CUDA/PyTorch

Languages

Hindi: Native **English:** Proficient (C2 Listening, C1 Writing, B2 Speaking/Reading)
